

NEW PHOTO QUIZ

This image was captured by an automated time-lapse camera on 21 November 2006 in a mature swamp forest about 500 feet from the Choctawhatchee River in the western Florida panhandle.

What do you think these three birds are? Please e-mail your analysis (300 words, non-negotiable maximum) of the identity of the birds to Chris Wood <clw37@cornell.edu> and Ted Floyd <tfloyd@aba.org>. We will publish all analyses that seriously attempt to identify the three birds in the image, but we cannot consider any responses in excess of 300 words. Time is of the essence!—please e-mail your analysis to Chris and Ted no later than Friday, 20 July 2007.

Play the ABA's online photo quiz <aba.org/photoquiz> for your chance to win a prize donated by NGS Handheld Birds.
