Birding

VOL.39 • NO.5 • SEPTEMBER/OCTOBER 2007

In this issue: All populations of organisms are variable to some degree or another. Variation in birds is striking and eminently field observable, and typically leads to the central question for this issue of *Birding*: What's going on here?

Cover photograph: Red-winged Blackbird. Otter Tail County, Minnesota; June 2005. © Greg Forcey.

More information on the cover photograph available online <aba.org/pubs/birding/archives/vol39no5p5w1.pdf>.
